1. The Toronto Congress Centre voltages are 600/120/208 volts 3 phase. Please check with your technical coordinator to see if your machines are compatible with these voltages. If so, you will save on costs.
2. All other voltages are available from LANGE with the use of a transformer. Transformers must be placed within your booth space so please allow for the transformer when you do your space plan/layout. Approximate size can be provided by LANGE (see below for contact info).
3. Transformers will be required on 208 volt connections greater than 30 amps.
4. 600 volt connections do not require a transformer.
5. The Toronto Congress Centre does not have floor ports.
6. Power will be distributed by LANGE from exterior walls, columns (in some buildings) and cable drops from the ceiling.
7. If you have an Island booth, please indicate a main power drop location on LANGE's Booth Layout Form and submit the form with your Electrical & Lighting Order Form. We will distribute under carpet outlets from that location.

Ontario's Electrical Safety Authority (ESA) requires that all machinery that will be displayed and/or powered up during an event must be approved by the ESA before show opening. Exhibitors are responsible to obtain "Permission to Show/Energize" from the ESA directly. LANGE cannot apply or be responsible for this permission. To obtain the ESA "Permission to Show/Energize Application", go to <https://www.esasafe.com/consumers/permits-and-inspections/inspection-forms> to apply for permission/approval from the ESA. **Apply as soon as possible to avoid onsite complications.**
